SUMMARY

My research focuses on using mechanics, applied mathematics, and computational science to understand and represent the complex behavior of materials, e.g., crack propagation and multiphysics effects in materials and particle breakage and interlocking in granular media. My research expertise and interests include mechanics of solids and granular media, multiphysics and multiscale modeling of engineering and biomedical systems, uncertainty quantification, and applications and advancement of neural networks to engineering problems. My vision is to make a significant impact in the areas of engineering analysis and design using computational mechanics.

POSITIONS

Research Associate

Dec 2020 – present

Oden Institute for Computational Engineering and Sciences

The University of Texas at Austin, Austin, TX 78712, USA

PI: Prof. J. Tinsley Oden

► PAST POSITIONS

Adjunct Faculty

Aug 2021 – Dec 2021

Department of Aerospace Engineering and Engineering Mechanics

The University of Texas at Austin, Austin, TX 78712, USA

Adjunct Faculty

Aug 2021 – Dec 2021

Department of Biomedical Engineering

The University of Texas at Austin, Austin, TX 78712, USA

Peter O'Donnell

Postdoctoral Fellow

Aug 2019 – Nov 2020

Oden Institute for Computational Engineering and Sciences

The University of Texas at Austin, Austin, TX 78712, USA

PI: Prof. J. Tinsley Oden

Postdoctoral Fellow

Oct 2016 – Jul 2019

Department of Mathematics

Louisiana State University, Baton Rouge, LA 70803, USA

PI: Prof. Robert Lipton

EDUCATION

Ph.D.

2012 – 2016

Civil and Environmental Engineering

Carnegie Mellon University, Pittsburgh, PA 15213, USA

Adviser: Prof. Kaushik Dayal

Thesis: Coarse graining of electric field interactions with materials

M.E.

2010 – 2012

Mechanical Engineering

Indian Institute of Science, Bengaluru, KA 560012, India

Adviser: Prof. Chandrashekhara S. Jog

Thesis: A monolithic strategy for fluid-structure interaction in compressible flow

B.E.

2006 – 2010

Mechanical Engineering

Govt. Engineering College, Raipur, CG 492001, India

TEACHING EXPERIENCES

COE 311K

Fall 2021

Engineering Computation

Department of Aerospace Engineering and Engineering Mechanics

The University of Texas at Austin, Austin, TX 78712, USA

BME 313L

Fall 2021

Introduction to Numerical Methods in Biomedical Engineering

Department of Biomedical Engineering

The University of Texas at Austin, Austin, TX 78712, USA

JOURNAL RESPONSIBILITIES

► JOURNAL EDITING

Associate Editor

Jul 2021 – present

Journal of Peridynamics and Nonlocal Modeling (JPER) ([link](#))

Topic Editor

Aug 2021 – present

Journal of Open Source Software (JOSS) ([link](#))

► JOURNAL REVIEWS

CMAME (15+ reviews), JMPS, SINUM, M3AS, MMS, JALCOM, IJMST, BMJ Open, Mathematical Reviews (AMS), PHYSICA

EXPERTISE

▷ SKILLS

Continuum Mechanics; Multiphysics Modeling and Simulation; Numerical Methods for Differential Equations, Optimization, Algebraic System of Equations; Finite Element Analysis; Fracture Mechanics; Constitutive Modeling; Phase-field Methods; Continuum Mixture Theory; Uncertainty Quantification; Bayesian Inference; Optimal Experimental Design; Machine Learning

▷ PROGRAMMING LANGUAGES AND TOOLS

C and C++; MATLAB and OCTAVE; Python; Shell; Git; Docker

GRANTS

- | | |
|---------------------------|--|
| 1. MDACC-Oden-TACC | A mechanistic tumor growth model for HP MRI |
| Sep 2020 – Mar 2022 | PI: Fuentes (MD Anderson Cancer Center), co-PI: Jha |
| \$50k | |

MAJOR PROJECTS (* – ONGOING, ** – COMPLETED)

- ***Bayesian calibration and inverse problems in mechanics** (at UT Austin)
 - Proposed a Bayesian inference method for the calibration of PDE-based models; the method employs goal-oriented a-posteriori estimates of modeling error [JhaOden-JCP-2022](#)
 - Faster MCMC parameter sampling by utilizing computationally cheaper approximations of the error in QoIs
 - Enhancing the application of the neural operator to Bayesian inverse problems by computing correction to neural operator prediction [CaoRoseberryJha-Residual-2022](#)
 - Significantly improved performance when correcting the neural operator predictions (examples include nonlinear Poisson equation and hyperelasticity)
- ***Multiphysics modeling of tissue-scale tumor growth** (at UT Austin)
 - Developed a 3D-1D model of tumor growth and angiogenesis, coupling the evolution of tumors with the flow in tissue and vascular network [Nonlin-2021](#), [CMAME-2021](#)
 - 1D Poiseuille flow model and Darcy's law to simulate the flow in a vascular network and tissue domain, respectively
 - Evolution of tumors, proteins, and drugs based on continuum mixture theory and phase-field method
- ***Optimal experimental design for Hyperpolarized (HP) MRI** (at UT Austin)
 - Determining HP scan parameters (design parameters) such as flip angles and repetition times is non-trivial due to the signal decay and instantaneous signal loss during a scan
 - Proposed a method based on mutual information to determine the optimal design parameters that increase the information content of data [JhaFuentes-MRM-2022](#)
 - Received a grant of \$50k as a co-PI (D. Fuentes as PI) for the duration of Sep 2020 – Mar 2022
- ***High-fidelity mechanics model for granular media** (at UT Austin)
 - Discrete Element Method (DEM) based models are restricted to spherical particles and can not simulate particle breakage
 - Combined peridynamics (nonlocal theory of fracture) and DEM and proposed a novel high-fidelity model called PeriDEM that overcomes the limitations of DEM-based models [JMPS-2021](#)
 - Open-source software available on GitHub ([PeriDEM](#))
- ***Relating peridynamics and classical linear elastic fracture mechanics (LEFM)** (at UT Austin and LSU, Baton Rouge)
 - Connecting LEFM and peridynamics is of great interest for the validation and broader integration of peridynamics
 - We showed that peridynamics satisfies the LEFM energy relation [JhaLipton-IJFrac-2021](#), [LiptonJha-Nonlin-2021](#) [LiptonJha-JPER-2019](#)
 - In the absence of fracture, peridynamics approximates elastodynamics [JhaLipton-IJNME-2018](#)
 - Obtained a CFL-like stability condition for an explicit time discretization of peridynamics [JhaLipton-IJNME-2018](#)
- ****Numerical method and analysis of peridynamics theory of fracture in solids** (at LSU, Baton Rouge)
 - Implemented and studied numerical methods such as finite difference and finite element for peridynamics [JhaLipton-SINUM-2018](#), [JhaLipton-DCDSB-2021](#), [JhaLipton-CMAME-2019](#)
 - Showed that the numerical solution converges to the exact solution as expected (an important contribution as such results were not clearly established before our work)
- ****Multiscale modeling of electrical interaction in ionic solids** (at CMU, Pittsburgh)
 - Coulombic interactions are long-ranged, and it is challenging to integrate them with multiscale methods, e.g., Quasicontinuum (QC) method
 - Obtained a continuum limit approximation of Coulombic (electrostatic) interaction and utilized the limiting energy to develop a QC method with electrostatic interaction [JhaMarshallKnapDayal-Multiscale](#), [JhaDayal-ContinuumLimit](#), [Jha-PhDThesis-2016](#)
- ****Discrete-to-continuum limit of electrostatic interaction in nanostructures** (at CMU, Pittsburgh)
 - Performed a rigorous derivation of continuum limit of electrostatic interaction in nanostructures with rotational and translational symmetries [JhaDayal-ContinuumLimit](#)
 - Unlike in the case of 3D crystal structures, the limiting electrostatic energy in nanostructures is local

- The limiting energy includes contributions from both the tangential and normal components of the dipole moment field; tangential components not present in the limiting energy obtained through dimensional reduction techniques
- ****Monolithic fluid-structure interaction (FSI) formulation** (at IISc, Bangalore)
 - Developed a monolithic arbitrary Lagrangian-Eulerian (ALE) formulation for FSI problems
 - Compressible fluid and nonlinear solid undergoing large deformation
 - Mapped the Navier-Stokes equations for compressible fluid to the reference configuration
 - Developed energy-conserving time discretization and finite element spatial discretization of nonlinear coupled partial differential equations

PROFESSIONAL ACTIVITIES

▷ CONFERENCE ORGANIZATION

- With colleagues, organized (as the main organizer) a USACM thematic conference on computational oncology. Jan 2022. [Conference site](#).
- Co-organized a minisymposium M19 on "Nonlocal models in mathematics and computation" at the SIAM TX-LA 3rd Annual Meeting. Oct 2020.

▷ MENTORING

- Co-mentored a student working on the development of distributed solver for a nonlocal diffusion equation. Google Summer of Code 2020. [Related github repository](#). Summer 2020.

OPEN-SOURCED SOFTWARE

- **PeriDEM**. Implementation of high-fidelity model (PeriDEM, JMPS 2021) of granular media.
- **NLMech**. Peridynamics simulation library. (With P. Diehl).
- **BayesForSEIRD**. Bayesian calibration and validation of the SEIRD epidemic model. (With L. Cao).
- **Angiogenesis3D1D**. Angiogenesis and tumor growth using 3D-1D model. (With T. Köppl, A. Wagner, M. Fritz).

AWARDS AND ACHIEVEMENTS

- | | |
|----------------------------------|--|
| 1. GATE exam
May 2010 | All India rank 31 (957/1000 score) in GATE-2010 exam
<i>India</i> |
| 2. TA Award
May 2013 | Best Teaching Assistant award for the graduate level finite-element course
<i>Carnegie Mellon University, Pittsburgh, PA 15213, USA</i> |
| 3. Fellowship
Aug 2019 | Peter O’Donnell Postdoctoral Fellowship (competitive, about 4 fellowships a year)
<i>The University of Texas at Austin, Austin, TX 78712, USA</i> |
